ISTE AUTHORIZED
Certification PROVIDER

Focused on Standards. Based on Pedagogy.

The ISTE Certification is focused on pedagogy, not tools.

It's about leveraging the power of technology to transform learning and improve student outcomes.

ISTE Certification for Educators is a new competency-based, vendor- and device-neutral teacher certification based on the ISTE Standards for Educators. This digital credential recognizes educators who understand how to use educational technology for learning in meaningful and transformative ways, founded in the ISTE Standards.

Steps to becoming an ISTE Certified Educator

- ❑ Register for a training session (Certification-only or Certification + Graduate Credit)
- ❑ Attend synchronous and asynchronous workshops (3 days)
 - ❑ Complete asynchronous work between workshops
- ❑ Complete online course (9-weeks, 30-hours for Certification, 45-hours for Certification + Graduate Credit)
- ❑ Prepare and submit an ePortfolio to ISTE for review (6 months) - the educator will be provided access to a certification portal where participants can get feedback from their cohort while preparing their portfolio of artifacts and reflections.
- ❑ Once submitted, ISTE Certification Evaluators will review the artifacts. Those who successfully meet the certification will become ISTE Certified Educators.
- ❑ More information at <http://iste.iu12.org>
